

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

INTRODUCTION.

THE volumes of the "Manuals of the Corporation of the City of New York," which is the full title of what are generally known as "Valentine's Manuals," contain, besides the statistics and lists of city officers, a mass of "Historical" matter, consisting of extracts from old city records and old newspapers, descriptions of old maps and views, reminiscences of old residents, etc., interspersed with a lot of miscellaneous matter, some of which does not relate to New York at all, strung together without any apparent order or system, just as they happened to come into the hands of the printer. This forms a queer patchwork of rather uneven value, filling a little over four thousand pages in twenty-six of the twenty-eight volumes, of which a complete set consists.

They also contain some 800 illustrations and maps, most of them of great interest at this time, distributed through the volumes with the same disregard of system, and if possible adding to the confusion by having descriptions in one volume while the prints are in another.

To this add a variety of sizes, running through the whole gamut from 18mos to 8vos, the first three being 18mos, the next four 16mos, then eighteen 12mos, winding up with three 8vos; complement this with repetitions both of prints and of articles, and you have a literary mess which it would be hard to equal and which has always been the despair of the student. The only thing in which these volumes maintained an unbroken uniformity is their absolute lack of plan or system.

Mr. Valentine, who is supposed to have edited the "Manuals," was clerk of the Common Council during the publication of all but the last three, and, although an

INTRODUCTION.

amiable gentleman, was not, as is generally believed, a great historical scholar, but gathered what he could find for his books without any very searching investigation as to its merit. Fortunately for him and for us, among his advisers and helpers were a number of very excellent authorities on our old history, such as William Kelby, H. B. Dawson, Dr. Francis, and a few others, to whom their historical value is chiefly due.

During a number of years of a somewhat close study of the older history of the city, I often found the "Manuals" useful as guides, so that I accumulated quite a large number of references to the various volumes, and when a portion of these was accidentally destroyed I determined to go carefully over the whole mass again. The 2325 references which form this index are the result of this second examination. The first column to the right of the page refers to the date of the manual, the second to the pages.

It will be necessary to say that these references are mainly to the subject-matter and not to the long lists of officers which occur there, as most of these can be found in the alphabetical list in the volume for 1870.

Of course the index was made for my own use at the time, but at the request of Mr. Harper, who believed it would interest others sufficiently to warrant him in printing it, I cheerfully turned it over to him and will be well repaid if it serves to stimulate and keep alive that interest in old New York which now seems to be so general.

O. H.

MT. VERNON, N. Y., Nov. 15, 1899.
